

COVID-19 NOTICE

Last Updated September 8, 2020

As public health guidelines related to COVID-19 evolve, all updates regarding service adjustments will be available on our website at www.centrelakeimaging.com and main telephone message at 909-242-7300.

Our teams and doctors remain flexible to adapt to the needs and safety of our patients, community, and referring providers. We are committed to being fully focused on providing high quality and compassionate care during this fluid and unprecedented time.

No Visitor Policy: To minimize risk of exposure relating to COVID-19, all person(s) accompanying the patient must remain outside of the facility or in their vehicle.

Social Distancing: All patients and accompanying person(s) are required to maintain at least 6 feet from other person(s) in reception, waiting area, and any other common areas in the facility.

Masks Required: All person(s) entering are required to wear a mask over their nose and mouth.

COVID-19 Screening: All patients and accompanying person(s) are subject to COVID-19 Screening Questions (see below) and will have temperature recorded on-site at check-in/entry.

COVID-19 Screening Guidelines: Updated September 8, 2020

Centrelake Imaging & Oncology is dedicated to the health of our patients and staff. As part of this commitment, we are following CDC recommendations for minimizing the risk of exposure relating to COVID-19. Please ask yourself the following questions before you arrive to our facility:

COVID-19 QUESTIONNAIRE – PATIENTS & ACCOMPANYING PERSON(S)

Name: _____

Office Use Only: Temp: _____

DOB: _____

1. DO YOU HAVE:

(a) Diagnosis of COVID-19? If YES, date of diagnosis: _____ YES OR NO

(b) Two of these symptoms in the PAST 14 DAYS?

1. Fever above 100.4° F? YES OR NO

2. Cough? YES OR NO

3. Shortness of breath or difficulty breathing? YES OR NO

4. Sore Throat? YES OR NO

09.08.20

- 5. Congestion or runny nose? YES OR NO
- 6. Chills or repeated shaking with chills? YES OR NO
- 7. New loss of taste or smell? YES OR NO
- 8. Nausea, vomiting, or diarrhea WITH a fever? YES OR NO

2. IN THE PAST 14 DAYS, HAVE YOU:

- Had direct exposure (within 6 feet) with person(s) testing positive for COVID-19? YES OR NO
- Been told to quarantine by doctor or medical professional? YES OR NO

3. ARE YOU VISITING OUR FACILITY TO:

- Rule out COVID-19? YES OR NO

If you answered “**YES**” to any of the questions [or any 2 symptoms of Section 1(b)], please call your primary care physician. To protect yourself and others, you are required to wear a mask to help prevent the spread of this virus until you have been treated by your doctor. If you feel seriously ill, visit the emergency department or contact local health department but wear a mask and contact the emergency department ahead of your visit via telephone to inform them of your symptoms and exposure.

Date

I have an appointment scheduled, should I cancel it?

If you are experiencing symptoms consistent with COVID-19 (See “Screening Guidelines” above), please stay home, limit your exposure to other people and monitor symptoms. If you are experiencing a fever and respiratory symptoms, please contact us prior to coming in.

If you feel very sick, with a high fever, shortness of breath or more severe respiratory symptoms and you or your care team feel you need to go to the ER, make sure you or your caregiver call ahead to let the ER know you have respiratory viral symptoms so they can prepare for your arrival.

What can we do to protect ourselves?

The same good health habits that prevent other viruses like the flu, also prevent the spread of COVID-19. They also decrease the risk of getting sick, which would make you more susceptible to COVID-19.

These include:

- Stay home when you are feeling ill (fever, cough, cold).
 - **Wash your hands often with soap and water for at least 20 seconds, especially after going to the bathroom; before eating; and after blowing your nose, coughing, or sneezing.**
 - **Wash your hands often with soap and water for at least 20 seconds, especially after going to the bathroom; before eating; and after blowing your nose, coughing, or sneezing.**
 - Avoid close contact with people who are sick.
 - Avoid touching your eyes, nose and mouth.
 - Cover your cough or sneeze into your arm. If you use a tissue, discard the tissue in the trash and wash your hands or use an alcohol-based hand sanitizer.
 - Clean and disinfect frequently touched objects (door handles, light switches) and surfaces using a regular household cleaning spray or wipe.
 - Get plenty of rest, drink plenty of fluids, eat healthy foods, and manage your stress to keep your immunity strong.
-
